20. Click on Install

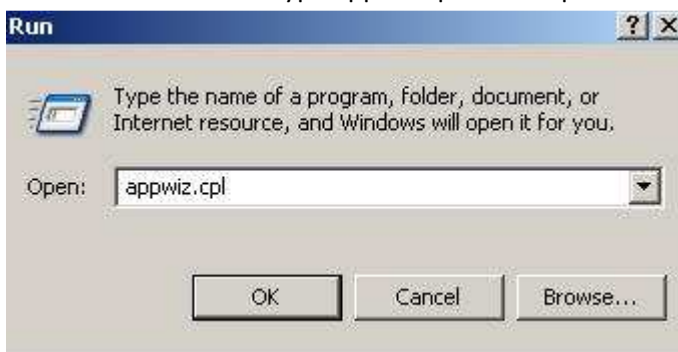

21. Patch Update installation is in progress

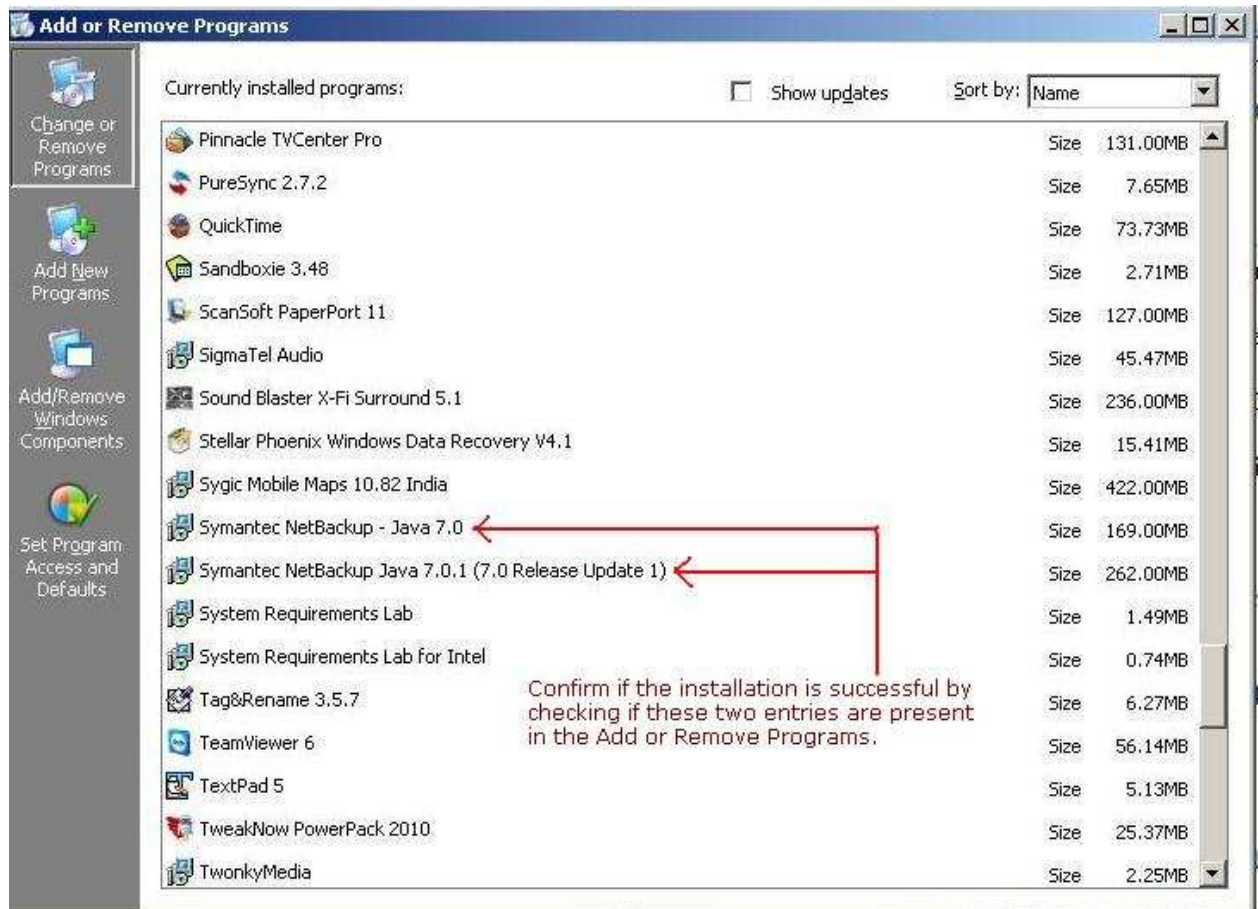

22. Click on Finish. Netbackup 7.0.1 Java console Patch Update is complete

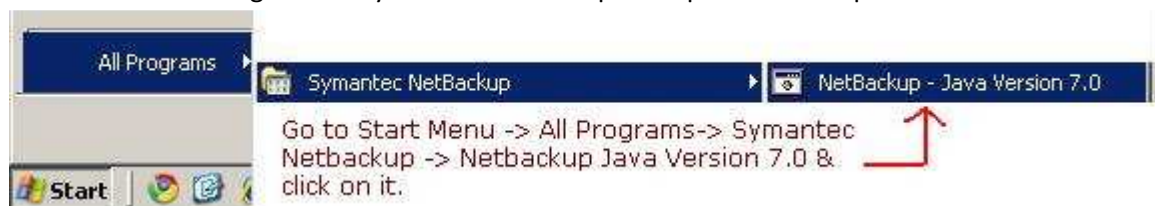

23. Go to Start -> Run and type appwiz.cpl. It will open the Add/Remove Programs window

24. Verify the installation was successful by checking if the below two entries are present in the Add/ Remove Programs

25. Go to Start -> All Programs -> Symantec NetBackup and open NetBackup Java Version 7.0

26. Enter the Master Server Name in the Host Name and your User name and password to log in to the Netbackup Java Console.

The screenshot shows the 'NetBackup Administration Console' window. The title bar reads 'NetBackup Administration Console'. Below the title bar is a yellow header with the Symantec NetBackup logo. The main content area has a light gray background. On the left, there is a vertical yellow sidebar with a 3D box icon. The main area contains the following text and fields:

You may administer NetBackup on any NetBackup host. To login, enter the username and password for the specified NetBackup host.

Host name:
nbupitsun002

User name:
akishore

Password:

Below the password field is a small button labeled 'User Password'. At the bottom of the form are three buttons: 'Login', 'Cancel', and 'Help'. At the very bottom, the copyright notice reads: 'Copyright © 2010 Symantec Corporation. All rights reserved.'
